

Post-Traumatic Stress Disorder Screening Tool

This is a screening measure to help you determine whether you might have post-traumatic stress disorder (PTSD) that needs professional attention. This screening tool is not designed to make a diagnosis of PTSD but to be shared with your primary care physician or mental health professional to inform further conversations about diagnosis and treatment.

Directions:

1. Complete the provided form
2. Print out the results
3. If after taking the assessment you believe you have the signs of PTSD, share this assessment with your health care provider, a mental health professional or Caterpillar's Employee Assistance Program to determine next steps.
